

## REMARKS

It is asserted that the disclosure contains sequences which fall under the purview of 37 C.F.R. 1.821-1.825 as requiring SEQ ID NOS but are not so identified. It is stated in the Office Action that "at page 124 of the instant specification, an amino acid sequence in excess of 4 aa long is disclosed, and not identified by a SEQ ID NO".

In response, Applicants respectfully point that in the response submitted February 3, 2005, a copy of which is included herewith, Applicants did specifically request that page 124 be amended to insert a SEQ ID NO. Applicants have additionally reviewed the specification and believe that all sequences have been identified.

If a telephone conversation would further the prosecution of the present application, Applicants' undersigned attorney request that he be contacted at the number provided below.

Respectfully submitted,

A handwritten signature in cursive script, reading "Cheryl H. Agris".
